

Mountain Computers™ Inc. Newsletter - January 27, 2012

The Best Place in Nevada to take your PC & Business for over 5 years and running!

COMPUTER STACK RANK 2012

Every year, Mountain Computers will publish its latest stack rank of computers and their overall value. We naturally update this information by the month, and we use to post it to our HTML based website for those to review; however, we have moved to a PDF newsletter on a weekly basis.

Here is the 2012 list based on price, performance, quality, dependability, warranty, and support.

- #1 Windows Laptop - Sony Vaio Z series, or Apple Macintosh Macbook Pro, side note - ASUS is numero uno!
- #2 Windows Laptop - Dell Inspiron 15R or 17R.
- #1 Desktop is the Dell Optiplex 380, 780, 980 series, i7 core series, and i5 core series is what we offer as well!
- #2 Laptop and Desktop is a horserace; HP, Toshiba, Lenovo
- #3 Laptop and Desktop is the Acer, Compaq, Gateway

TECH TIPS OF THE WEEK

1. Your home Internet router has a firewall. Your computers have built-in firewalls. That is two firewalls. Your antivirus program might replace your operating system's firewall. How many firewalls do you need? Just one, but two are better than none just not on the same computer.
2. You only need one anti-virus program.
