

NETWORK DATA PROTECTION PART II

Integra Telecom in Reno Nevada is investing in the Northern Nevada market heavily. I would suggest your business consider switching from other providers and move to a more economical technology provider that has superior technology, support, and long term vision. AT&T is dying on the vine because they are very pompous on their long held strangle hold on the world. Competition is very abundant, and AT&T should concede to improving their technology and service. In the meantime, Integra Telecom is moving fast and smartly so. Mountain Computers has been an Integra Telecom business customer for more than 2 years. GBIS still rocks the local residential solution.

For more information on Integra Telecom products and services, give Mountain Computers a call, talk to Andy.

MICROSOFT OFFICE VERSUS OPEN OFFICE VERUS WORDPERFECT

In the past few weeks, more and more customers are challenged with finding their Microsoft Office CDs and serial number to reload their Microsoft Office after a computer OS reload. Here are the best tips we can offer that we have offered for nearly 20 years.

1. Call Microsoft at 1-800-426-9400, and tell them your problem; you purchased your Microsoft Office, and you have lost your CD/DVD and the serial number. See what they can do for you. With the Internet today, your record of purchase can be resolved. Microsoft might give you the 800# of the OEM where you purchased your Microsoft Office or computer depending on your situation. Don't give up. Microsoft's goal is to give the best customer service and get you back up and running with your Microsoft office software.
2. If you are using WordPerfect, and your computer crashes, and you do not have your WordPerfect CD or serial number, then for a short term, use Open Office 3.2 or higher that is free of charge that will allow you to open up your files and work on them until you find your WordPerfect software.
3. Mountain Computers suggests that the population around the world move to Open Office. Free. Easy to Support.

COMPUTER PARTS AND THE BTO RENO DILEMMA - PT II

In Reno and Sparks Nevada, there are quite a few new computer startups in the past two months. Our company notices them and notice what they are doing and not doing; legally and not so legally. We would recommend carefully weighing the options and consider the overall results. Try them, and if you like them, go with them; however, we are a moving fast too to continue on our 5 years of success based on sharpening our skills too as the computer problems evolve, and the Internet and viruses explodes, but the down home computer hardware problems remain simple and the same.

Should we name the new companies that we have noticed? We have noticed them and sized them up to see how we can improve based on them sizing our company up.

We still believe we still win as The Best Place in Nevada to take your PC & Business.

TECH TIPS OF THE WEEK

1. While doing spring cleaning, look for your computer software and CDs or DVDs that needs to repair or reload their computer. Call us if you have a question like should I throw it away or keep it.
2. Get a can of air from a local supplier to blow out your laptop fans or computer power supplies soon. We have them here!
