

NETWORK DATA PROTECTION PART III

Should you consider the Cloud or not? As a business owner; protection of your local network and data is of the utmost concern aside from the primary goal of providing your products and services 24/7. We have worked with two primary Cloud companies; Velare Systems of Portland Oregon, and another in San Diego, and the product is not mature. The problem with the cloud is the privacy and protection assuredness problem. For 50 years, business owners walk in and see their server and their data, and require backups (now offsite and redundant). The paradigm shift and trust of cloud data is a problem. I suggest we hybrid the solution; "OS & Apps in the cloud, & Data Local!"™

MOUNTAIN COMPUTERS TRAINING CENTERS EVOLVE & HIT THE STREET MARCH 2012

Mountain Computers is proud to offer State of Nevada approved computer training classes to help the public at large, unemployed, veterans, and small and large businesses. Since 2006, Mountain Computers was approved by Nevada Works and the state's program; yet we had limited space. The problem has been resolved.

The computer training centers are based on 20 years of experience in the industry of support and training. Our staff are the best in the world. 3rd party solution providers are great; yet in our small footprint we have the best that meet the needs of the street.

We look forward to your involvement. The courses will include introduction classes and courses that will help you and your company reach levels of performance and efficiency required for all ages.

Mountain Computers has in its arsenal one of the primary leaders of Microsoft CubeNotes regarding simplifying and optimizing, and programming Microsoft Word for Windows. The extension of this noteworthy leadership goes to Excel and other applications within the Microsoft Office suite. Mountain Computers could not have accomplished this success without the help of Great Basin Data Recovery and Technology Center of Reno.

COMPUTER PARTS AND THE BTO RENO DILEMMA PT III

In Northern Nevada, we shall list the companies we are great friends with and recommend without necessarily affecting our success.

- Mountain Computers Inc - Andy - Computer Repair / BTO / advanced engineering expertise at various levels; Serving retail customers, home, small and medium business owners.
- Technology Center - Curtis/Kevin; Enterprise, Printer Repair and Parts ; Serving Enterprise customers like casinos and more. Primarily on the retail side printers and some retail computer repair. Helped Andy get started with Mountain Computers via Pana Wholesale.
- Advantage Computers - Jasmine - serving NW Reno; Serving the gambit of whatever comes in the door. Unsure of particular focus.
- Harry's Business Machines - Terri - providing ID badge systems to the casino industry; limited computer repair.

The Northern Nevada Triad of Mountain Computers, Technology Center, Advantage Computers is about providing customers the best solution for what each does best. There a 40+ independents and a brief group of startups in the past 6 months.

- Other Independents - Cypress Systems, Friendly Computers, ProTechnical, and et al .

TECH TIPS OF THE WEEKd

1. Do you carry your jump drive in your pocket? Be sure to make sure you don't leave it in your pants or jacket. It might get washed and not survive the water.
2. iTunes is great, but I suggest you make sure you backup your music manually to a secondary hard drive or computer in case your SATA/SSD hard drive crashes.
