

# Mountain Computers™ Inc. Newsletter - April 14, 2012

*The Best Place in Nevada to take your PC & Business for over 5 years and running!*

## NETWORK DATA PROTECTION PART IV

You ask yourself, "What is the problem with my wireless connection?" Situation: Your wireless on your home or office wireless sometimes works and then sometimes does not work. The problem could be in your old wireless router or old wireless adapter in your computer. If you can locate the model number of your router, then look it up and see how old it is or call our store and we can look for you. If the router is over 7 years old, it is time to replace it. If it is leased from an internet provider, ask them to upgrade it for you free of charge. If your wireless adapter in your computer is just old. Time to replace it and get your wireless security and network connection brought up to date. Give our store a call and look into our recommended replacements and solutions. Call 775-287-9552.

## MOUNTAIN COMPUTERS TRAINING CENTERS - APRIL 16, 2012 - First Class - MTN 101

Monday, April 16, 2012, Mountain Computers will provide it's first training class since late 2006. The MTN 101 course will be offered and delivered at Great Basin Data Recovery. The first class will be 4 students and we hope to have it filled in latter courses to the capacity of 8.

- If you are interested in attending or pre-registering for our MTN 101 course, please contact our office at 775-287-9552 and speak with Julie or Andy, and we can answer your questions and help you with registration.
- The Mountain Computers training pages on our website will offer you a set of goals in each course, week, by day to give you a taste of the training course.
- If your employer or colleague you believe could benefit from this course or any others, please give us a call.
- If you are a private or government staffing agency, we can offer group rates.

Thank you in advance. Mountain Computers could not have accomplished this success without the help of Great Basin Data Recovery and Technology Center of Reno.

## BTO SOLUTION - Best Buy Gone - Enter Fries Electronics

With the demise of Best Buy and the Geek Squad, what is the next best play for Northern Nevada? I have anticipated Best Buy's demise for over 1 year. In the last 6 months, I could smell the blood in the water. Over 2 years ago, I said quietly to confidantes, this is what we need in a series of steps and solutions. We need a GameWorks where the Scheels is now standing within a Sparks Nevada type of mall, fully enclosed and covered to provide protection from the elements. Scheels came in and devised their solution very stupidly. Bad design, great execution. Scheels will close within 18 months. The Scheels design is like any NDOT solution, bad design, lots of wasted taxpayer money, and still frustrated customers and still a bad spaghetti bowl.

Now, 1 year ago, I suggested to my confidantes, with the demise of Best Buy as predicted, we should approach Fries Electronics and target the old Plumb/Park Lane mall, empty 20 acres, two banks, 2 casinos, a century theatres 16, great ingress and egress, 1 mile from the airport, McDonalds across the street, no competition, a connector to the mid-town Reno improvements, etc. My only request, finders fee and request for options. So I contacted Fries HQ and talked and pitched the problem, solution and opportunity, 2 times, and 2 follow-ups and finally I believe we made headway. An internal source at Fries said he has forwarded our problem and proposal to real estate and property development. Let us see what happens!

- This reminds me of my future preminitions of In-Out Burger. I was right and both locations I predicted over 6 months prior. Amazing!

## TECH TIPS OF THE WEEK

1. When you visit a website and it suggests you update your flash or java, defer and leave the website, reboot your computer and see if the message and update is real from your computer OS, not a website.
2. How many backups do you have? 1, 2, or none. Use Carbonite for home usage, and use an external set of hard drives for you office or small business. ps. Use 2nd Copy (gmbH) as well.

Mountain Computers Inc.  
490 E 8th St. Reno, Nevada 89512
